HOW TO CARE FOR CUT FLOWERS. Directions. Print out. Keep as a reference. See "Flower Food Recipe."

NAME _____

If you would like your cut flowers to last a little longer, do the following:

1. Fill a clean vase with water and add plant food.
2. Remove all the leaves that are below the water line.
3. On an angle cut a small amount off the ends of the flower stems just before you place them in the vase.
4. Do not leave the flowers out of water for an extended period of time.
5. Do not place flowers in direct sunlight or a warm setting since this will shorten their lifespan.
6. Change the water every day and feed every few days.
